

# Collaborative Solutions

IBM Lotus software

## Team Collaboration

Lotus QuickPlace.

Lotus Team Workplace (Quickplace) offers clear communication, effective collaboration and seamless coordination with customers and business partners. It facilitates instant decision making, collaboration on documents, reaching consensus through discussion, and coordination of plans, tasks and resources. Lotus Team Workplace provides workspaces to assist in managing mergers and acquisitions, product life-cycles and automated RFP (Request for Proposal).

## Web Conferencing/Instant Messaging

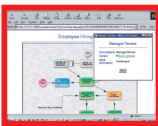

Lotus Sametime.

Lotus Instant Messaging and Lotus Web Conferencing (Sametime) is a secure, enterprise-ready instant messaging and Web conferencing solution for business. It helps speed communication, reduce travel expenses and produce results. With Lotus Instant Messaging and Lotus Web Conferencing, your employees, customers, partners, and suppliers can immediately and easily interact with one another in realtime.

## Process Management

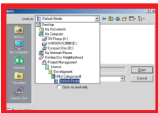

Lotus Workflow.

Lotus Workflow allows organizations to develop, manage, and monitor all business processes while helping eliminate the downfalls of paper-based work. It allows organizations to standardize and streamline time consuming, people-based activities and track their progress. More work can be done more quickly by fewer people, with fewer errors.

## Document Management

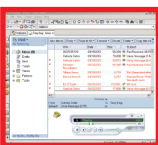

Lotus Domino.Doc.

Domino.Doc is a collaborative document management system for organizing documents for effective shared access by authorized work teams or individuals. Domino.Doc manages multiple versions, automates document-centric processes like review and approval, and provides the foundation for knowledge discovery and document lifecycle management solutions.

## Messaging and Wireless

Lotus Domino.

Using Lotus Domino/Notes-based solutions we can create end-to end web applications to boost productivity, streamline internal workflow and improve external communication. Our custom collaborative solutions development is designed around a top notch messaging infrastructure with an integrated set of services that enable you to easily create secure, interactive business processes.

With our extensive knowledge of Collaborative Solutions  
We can help improve communication within *your* organization
