

Self Service Kiosk Portal

Alacrinet has combined market leading enterprise middleware software from IBM and industry standard kiosk components to deliver a turn-key self service kiosk solution designed for IBM WebSphere Portal.

Software

Alacrinet Kiosk Manager Server Edition for IBM WebSphere Portal

The Alacrinet Kiosk Manager Server Edition extends the robust enterprise capabilities and services of IBM's WebSphere Portal.

- **Remote Management** - Automate monitoring of your kiosk environment 24x7
- **Usage Tracking and Reporting** - Track usage patterns to monitor user preferences
- **Content Management** - Deliver new content to all kiosks in your organization

Alacrinet Kiosk Manager Client for IBM WebSphere Portal

The Alacrinet Kiosk Manager Client makes administering your deployed kiosks effortless.

- **System Hardening** - Locks Down the operating environment for kiosk applications
- **Enhanced Security** - Secures network access to only authorized resources
- **Peripheral Management** - Governs custom integration with kiosk peripherals

Hardware

IBM Anyplace Kiosk

With the IBM Anyplace Kiosk you can deliver a rich, compelling interactive experience directly to employees, customers, or partners virtually anywhere. These kiosks combine robust computing power, a state-of-the-art infrared (IR) touchscreen display and optional peripherals in a slim, tapered design that is easy to place, service, and manage. Compact IBM Anyplace Kiosks can help you revolutionize your business, differentiate yourself from competitors, and influence end-user decisions as they happen.

IBM Anyplace Kiosk

Magnetic Strip Reader

The magnetic strip reader (MSR) is commonly integrated with applications to read employee security badges, time and attendance cards, customer loyalty cards, or debit and credit cards.

Magnetic Strip Reader

Kiosk Printer

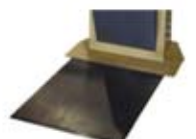

The thermal "inkless" kiosk printers are designed for installation in public access terminals and demanding self-service applications. They are extremely compact and are equipped with a unique, patented loop presenter mechanism with paper jam sensor which hides the document from the customer during printout and separation.

Kiosk Printer

Security Mat

Available with a wide variety of options, including surface style, connection method, size and shape, security mats can be customized to your specific installation and to match any decor. When a user steps off the mat, a signal is immediately sent to the kiosk to close the user session, securing private information.

Security Mat

Kiosk Enclosures

Alacrinet provides a selection of the most widely used kiosk enclosures with flexible configurations tailored to meet the demanding needs of our customers. (see back ->)
